### **Forthcoming policy developments**

According to the information provided by the Ministry of Human Capacities in 2020, the Government's measures are mainly going to support the housing of young people aiming to move away from their parents. Besides this, the Government is planning to play a more active role in increasing the number of young volunteers.

Contrary to the previous announcements, the Government does not plan the modification of the National Youth Strategy (effective till 2024) and the future directions for the following years will emphasise

1. family planning and support for starting families,
2. career guidance,
3. community development,
4. mental health,
5. sustainability, and
6. reflection to digitalisation.
